The ECE 110 and ECE 120 Merit program builds community among invited high-potential students in a welcoming and fun workshop setting. Students work on challenging problems in groups of 4 to 5 students facilitated by a trained TA. The problems are designed to extend concepts taught in class to real applications and are often open-ended, like the challenges faced by engineers in the real world. Grading is based on participation.

**COURSE DIRECTOR**

Prof. Chris Schmitz
